Highland Fold

HEAD Well rounded with full cheeks and a firm chin. Muzzle to have well rounded whisker pads.

EARS Folded forward and downward. Small - the smaller, tightly folded ear preferred over a loose fold and large ear. The ears should be set in a cap-like fashion to expose a rounded cranium. Ear tips to be rounded.

EYES Set well apart, large and well rounded. Wide open with a sweet expression.

NOSE Short and broad with a slight stop. A definite nose break is a fault. Profile is moderate in appearance.

NECK Short.

BODY Medium rounded and even from shoulder to pelvic girdle. The cat should stand firm on a well-padded body. Overall appearance of a well-rounded cat with medium bone. Males proportionately larger.

LEGS Medium in length and in proportion to body. There must be no hint of thickness or lack of mobility due to short, coarse legs.

PAWS Round with neat well-rounded toes.

TAIL Medium to long, but in proportion to the body. Flexible and slightly tapering. Longer, tapering tail preferred.

COAT Medium to long coat. Dense and soft in texture. Full of life, standing away from the body. Ruff, trousers and fairly full-to-full brush desirable.

COAT COLOUR All colours and patterns acceptable.

EYE COLOUR To correspond to coat colour/pattern.
